

Diary

NI Congjian

Week 1 began at Jun. 23th.

Week 1

Model- project application design

Week 2

Diffusion module constructed. Programming.

Week 3

A more precise diffusion module constructed. Programming and debugging.

Week 4

Model- binding evaluation design.

Week 5

Do several pretest of binding evaluation programme.

Week 6

Military training. Reading synthetic biology reviews.

Week 7

Results from binding evaluation model getted. Analysis.

Week 8

More effective results after optimizing the algorithm.

Week 9

Pretest of project application model. Primary results getted

Week 10

Analysis of the results. Start writing wiki.
